Why Leviat?

- Recognised and trusted worldwide
- ISO 9001 accredited
- Dedicated sales and technical support
- Design and scheduling service
- Installation guidance
- CAD details / BIM objects available

Design and Scheduling Service

- Coordination around obstructions such as live-end post-tension pockets, varying cavity sizes and corners
- Completion of all necessary fixing calculations negating the need for an Engineer

Ancon Continuous Shelf Angles provide flexible, cost-effective design solutions for the support of masonry cladding. They are designed to suit specific applications, taking into account loading, fixing position and cavity width.

Why choose a designed system?

- ✓ Material content optimised ensuring the most economic solution
- ✓ Lighter system makes handling and installation easy
- ✓ Supplied in lengths to suit specific site locations - no cutting or drilling required
- ✓ Mitres ready-cut for corners
- ✓ Allows adjustment in every direction
- ✓ Supplied complete with fixings
- ✓ Design to application ensures correct bearing for bricks
- ✓ Light gauge angle minimises expansion joint size
- ✓ Manufactured from corrosion-resistant stainless steel to suit AS 3700 durability classes
- ✓ Maintenance free

Adjustment is provided in every direction to allow for tolerance in the structural frame

Design sheet available from ancon.com.au

In a hurry?

Ancon MDC and CFA systems for 50mm cavities are available from stock in standard 1990mm lengths which can be cut on site.
