

lindapter® LRFD Load Data (Metric)

The Load and Resistance factor (LRFD) design strengths figures are taken from the ICC-ES Evaluation Report ESR-3330 for Hollo-Bolt (Table 2) and ESR-3976 for Girder Clamps (Table 3 and 4) and have been converted from **lbs** to **kN** (conversion 1 lb = 0.0044 kN). The LRFD Design Strengths have been calculated in accordance with the ICC-ES Acceptance Criteria AC437 and AC469.

Superior Corrosion Resistance

The durability of the Lindapter Hollo-Bolt is achieved by coating or by use of stainless steel and is categorised by Corrosivity Class in accordance with ISO 9223. Hollo-Bolts are also available with a special Sheraplex finish* (currently not included in ICC-ES ESR-3330) that are suitable for High and Very High Corrosion Categories C4 and C5. The length of corrosion protection provided by the Sheraplex coating depends on the exact application and environment, please contact Lindapter technical support or your local Leviat representative for more information.

* Sheraplex finish: Sheradized to BS 4921: 1988 Class 1 plus passivation and two coats of Delta Seal Silver.
